## NOTICE.

The collection we now offer for sale, undoubtedly the finest collection of ancient coins ever brought before the public of the United States, if we take into consideration the number, the rarity and the splendid conservation of the larger part of the coins contained in it, is a part of a large collection formed by a Cuban gentleman in a period of sixteen years, and was greatly derived from the public sales in Europe, a great number of the pieces catalogued coming from the famous collections of LORD NORTHWICK, DUPRÉ, CAPRANESI, GAILLARD, GARCIA DE LA TORRE &c. and have costed prices greatly higher than those now affixed to them.

In making this catalogue we have chiefly consulted the following works.

For coins of the Roman Republic: MIONNET, *De la Rareté et du Prix des Médailles Romaines*. BOURLIEZ, *Monnaies de la République Romaine*. H. COHEN, *Description des Médailles de la République Romaine*. HOFFMAN, *Le Numismate*.

For coins of the Roman Empire the book which has served as a guide is the exhausting work: COHEN, *Description des Monnaies frappées sous les Empereurs romains* 1859 à 1868. Seven vols Paris.

For the Byzantine Series we have followed. SABATIER, *Description générale des Monnaies Byzantines*, and SAULCY, *Essai de Classification*.

For Greek coins of Cities and Princes the principal work used has been MIONNET, *Description des Médailles Antiques* and its supplements, and many other modern works, as the Numismatical Library accompanying this collection is composed of more than three hundred of the rarest and most important works on this science.

At the commencement of every series we will indicate the works to which the classification refers.

All coins are warranted genuine and as represented, and will be sent for approval to any person giving satisfactory references.

The different parts of the catalogue will appear as soon as completed, the proprietor being yet engaged in making the catalogue of the Imperial and Greek Series. The largest part of the coins (7 000 out of 9.000) are already classified and will be shown to amateurs desiring to examine them at 40 & 42 Broadway, office of N. Ponce de Leon, Publisher & Printer.

# I.

## Coins of the Roman Republic.\*

### ÆS GRAVI.
